Projects

Enterprise Resource Planning (ERP)

Dec 2018 - Present (3 months)

Company: Zameen Media (Pvt) Limited / Zameen Media (Pvt) Limited

<http://empghr.com/>

Tools: Python, JavaScript, MariaDB, Frappe, ERPNEXT Development

(ERP) is the integrated management of core business processes. At Zameen.com, we are currently shifting our previous system to ERP Solution. Currently we are using ERPNext(A Famous Open Source ERP) to migrate from our current System. Currently we are working on **Human Resources Module** are developing the Following modules for all companies under **EMPG**

The Human Resources (HR) Module covers the processes linked to managing a team of co-workers. Most important feature here is processing the payroll by using **Payroll** Entry to generate **Salary Slips**. Most countries have complex tax rules stating which expenses the company can make on behalf of the Employees. There are a set of rules for the company to deduct taxes and social security from employee payroll. It also maintains a complete employee database including contact information, salary details, attendance, performance evaluation, and appraisal records.

Sub Modules in HR:

Leave Management, Payroll, Appraisal, Loan Management, Training, Recruitment, Shift Management, Fleet Management, Daily Work, Summary, Human Resources Reports, Employee And Attendance, Employee Lifecycle, Travel And Expense Claim

Lead Management System**Jul 2018 - Nov 2018 (4 months)****Company:** Zameen Media (Pvt) Limited / zameen.com**Tools:** Express.js , Node.js, MySQL, Angular, Objection.js, Sequelize.js

Lead Management System (LMS) is the Application portal for Zameen Telesales Employees. Leads generated by Facebook campaign or other Social Media Platforms gather into this system where Telesale leads assign different campaigns to their team members in different shifts. Then Telesales Team contacts with Actual person and ask client requirements and confirm orders. My Role as a Node.js Developer was to write SQL queries and build REST APIs using Node.js, Express.js, and Objection.js.

PlugExp**Nov 2017 - Jan 2018 (2 months)****Company:** BrainPlow / BrainPlowplugexpai.com**Tools:** Python Django , Rest API (REST FRAMEWORK), Web Sockets , Web Channels, Angular 5, Angular Universal, Angular Material Design

PlugExpAI is a platform to help Energy Providers maximize their Sales Revenue by showcasing their product packages on a well-maintained platform i.e. PlugExpAI!

CourseFrenzy**Oct 2017 - Mar 2018 (5 months)****Company:** BrainPlow / BrainPlowwww.coursefrenzy.com**Tools:** Python Django , Rest API (REST FRAMEWORK), Web Sockets , Web Channels, Angular 5, Angular Universal, Angular Material Design

CourseFrenzy is an Auction Marketplace to connect Instructors and Students together for worldwide learning experience. Courses can be Sold, Bought, and bid courses. CourseFrenzy assists the user through a trusted, neutral, time and money saving learning experience. Cutting to the chase, CourseFrenzy is the Online Courses Universe.

Shopping Cart For Client**Dec 2016 - Mar 2017 (3 months)****Company:** The Skill Lenders**Tools:** ASP.NET MVC, Entity Framework, HTML5, CSS3, JQuery, Javascript, Bootstrap**Billboard Digitization Web Portal****May 2016 - May 2017 (1 year)****Company:** The Skill Lenders**Tools:** ASP.NET MVC, Entity Framework, HTML5, CSS3, JQuery, Javascript, Bootstrap

A web Portal where user can advertise his products. Pay money and can advertise ads. The ad will be displayed in all cities where this Advertising Company puts it's Digital Billboards or LED's etc

GigHub**Jan 2016 - Feb 2016 (1 month)****Company:** The Skill Lenders**Tools:** ASP.NET MVC, Entity Framework, HTML5, CSS3, JQuery, Javascript, Bootstrap

A Portal For Artist or singers where they can upload their new Feeds with audience and audience can follow and see upcoming gigs of that Artist.
